

Sue Jackson

Pre reg MSc Physiotherapy MCSP

I've been working with Sheffield Neuro Physio since graduating from Sheffield Hallam University with a pre reg MSc in Physiotherapy which I passed with Distinction.

Since graduating, I have continued my professional development through completing Basic and Advanced Bobath, hydrotherapy and kinesiology taping courses. I have also completed a Neuro Rehab course focused on fitness within a neurological population.

I HAVE SPECIALIST AND EXTENSIVE EXPERIENCE IN

Stroke
Spinal cord injury
Traumatic acquired brain injury

Complex rehab
Multiple sclerosis
Other neurological conditions

I have also facilitated research projects through Sheffield Hallam University looking into user experiences of Power Assisted Exercise Machines and investigating the use of exoskeletons to support people with multiple sclerosis to maintain their fitness.

I am interested in working with individual clients to reach their personal goals, through movement analysis, specialist handling, education and challenging their expectations of themselves.

I believe strongly that all of us should be working to improve our fitness, no matter our current abilities, and enjoy adapting fitness guidelines to my clients and bringing fun and energy to our sessions.

“

She took great care and interest in my treatment. I always felt unique in my sessions with her.

”

“

She is very knowledgeable, patient and professional at all times
