

Sue Jackson

Pre reg MSc Physiotherapy MCSP

I graduated from Sheffield Hallam University with a pre reg MSc in Physiotherapy in January 2020, passing with Distinction. Prior to retraining I worked in fundraising for over 12 years.

Whilst training I discovered that I particularly enjoyed treating clients with neurological conditions. I completed a placement with Sheffield Neuro Physio and began to work with them in an assistant capacity.

I am now pleased to join Sheffield Neuro Physio as a qualified member of the team, fully supported by clinical specialists.

During the COVID-19 lockdown I worked at STEPS Rehabilitation, a specialist in-patient neurological rehab unit. I supported patients with stroke, spinal cord injury and traumatic brain injury.

I have an interest in power assisted exercise. My dissertation centred on the perspectives of power-assisted exercise amongst people with limited mobility.

I am working to build on my knowledge with further training, including introductory Bobath modules.

She took great care and interest in my treatment. I always felt unique in my sessions with her.

Sue is kind, understanding, a good listener and has nice hands!
